>>> Technical Skills

▶ Statistics:

High statistical awareness, focusing on statistical modelling and data analysis. I've worked with generalized linear mixed models, splines, longitudinal data, concordance analysis, state-space approach, pedigree and genomic-based models, graphical models, and non-linear models. I have experience with **classical and Bayesian views**.

▶ Genetics: Simulating animal and plant breeding programmes to test and com-

pare new schemes or evaluate how to improve genetic mean and variance. Experience in helping breeders with statistical analysis of real data using

software/packages like blupf90, BGLR, JAGS, and STAN.

Sports: Theory and application of statistical methods to evaluate athlete perfor-

mance and clinical trials.

▶ Agriculture: Planning experimental designs, analysis of entomologic and vegetable

production data

▶ R Packages: Enthusiast in creating R packages or functions as a solution to standardize

statistical analysis and delivery faster responses to clients. Some of public

packages: AlphaPart, AlphaSimR, lcc.

Dashboard: Skills in creating shiny dashboards as a solution for interactive data visu-

alization and analysis for clients. Example of public shiny app I developed:

COVID-19 prediction, Experiment Design.

▶ GitHub: Managing the Highlander Lab and AlphaGenes organizations. I handle

repositories, actions, projects, teams, and pull requests.

▶ HPC Servers: Ability to work with **high-performance computers** at the University of

Edinburgh to do statistical analysis.
